## The Importance of a Global Perspective on Stocks

- Two-thirds of the world's investment opportunities lie outside of the United States
- The U.S. represents only 15% of the world's total gross domestic product (GDP)<sup>1</sup>
- In 2019, 129 countries ranked ahead of the U.S. for GDP real growth rate<sup>1</sup>
- Global stocks outperformed U.S. stocks in 9 of the 20 calendar years from 2001 to 2020<sup>2</sup>

## Investment Objective

The principal goal of the Ave Maria World Equity Fund is long-term capital appreciation. The Fund invests at least 80% of its net assets in common stocks of companies whose focus is global in nature. The Fund will invest at least 60% of its net assets in common stocks issued by non-U.S. companies.<sup>1</sup>

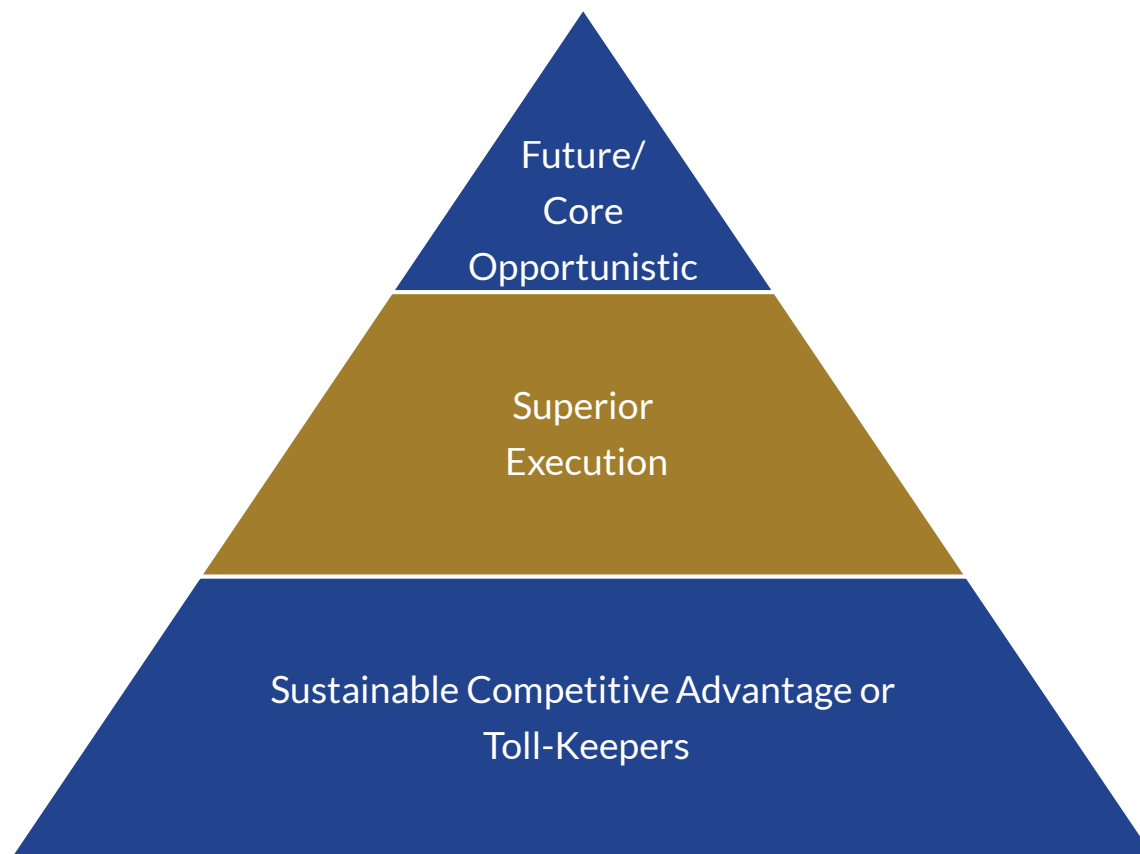

## Investment Philosophy

We seek to invest in competitively advantaged companies when they are mispriced by the market. We believe that fundamental research can identify these companies and may lead to long-term alpha generation.

<sup>1</sup> A company is deemed to be a “non-U.S. company” if it is headquartered outside the U.S. or has at least 50% of its revenues or operations outside of the U.S. at the time of original purchase.
