

AVE MARIA MUTUAL FUNDS

Q3 2022 ROLLING PERFORMANCE PERIODS

Mutual fund performance is shown in various ways including calendar year and annualized returns, but rolling periods may be a better way to illustrate what investors might experience.

Rolling periods represent a series of overlapping, smaller periods within a single, longer-term period. This method allows investors to evaluate the consistency of a fund's performance throughout market cycles.

The following pages illustrate the rolling periods of each Ave Maria Mutual Fund since its respective inception date and also the percentage of time it has outperformed its representative benchmark.

Ave Maria Mutual Funds are designed specifically for serious long-term investors who want to practice morally responsible investing (MRI). The Funds take a pro-life and pro-family approach to investing, with a proprietary moral screening process that examines corporate compliance with Catholic teaching regarding abortion, pornography, and policies that undermine the sacrament of marriage. Investments are made only in companies whose operations do not violate core teachings of the Roman Catholic Church as determined by the Funds' Catholic Advisory Board. The Board is composed of prominent Catholics who meet regularly to review the Funds' religious standards and criteria.

Important Definitions

Schwartz Investment Counsel, Inc., a registered investment adviser established in 1980, serves as investment adviser for Ave Maria Mutual Funds and invests only in securities that meet the Funds' investment and religious requirements. The returns may be lower or higher than if decisions were based solely on investment considerations. The method of security selection may or may not be successful and the Funds may underperform or outperform the stock market as a whole. All mutual funds are subject to market risk, including possible loss of principal. The Funds' investments in small and mid capitalization companies could experience greater volatility than investments in large capitalization companies. AVEWX invests in foreign securities and securities issued by U.S. entities with substantial foreign operations. Investments in these securities can involve additional risks relating to political, economic or regulatory conditions in foreign countries. These risks include less stringent investor protection and disclosure standards of some foreign markets; fluctuations in foreign currencies; and withholding or other taxes. AVEFX invests primarily in fixed income securities and as a result the Fund is also subject to the followings risks: interest rate risk, credit risk, credit rating risk and liquidity risk.
