SCHWARTZ INVESTMENT COUNSEL, INC.

Equity Investment Discipline

- ❑ Emphasize companies with superior business characteristics
- ❑ Utilize independent analysis and proprietary screening supplemented by Wall Street research
- ❑ Purchase shares of financially sound companies when they are out of favor and attractively priced
- ❑ Buy across market capitalizations if price represents a significant discount to our estimate of intrinsic value
- ❑ Contrarian discipline designed to reduce the risk of loss and enhance returns
- ❑ Sell stocks when they no longer meet our standards

SCHWARTZ INVESTMENT COUNSEL, INC.

Research Process

- ❑ Focus on fundamentals – income statements, balance sheets and cash flow statements in conjunction with growth prospects
- ❑ Augment with external research from a variety of sources (for factual data)
- ❑ Make decisions based on assessment of risk/reward relationship
- ❑ Investment committee comprised of all portfolio managers and analysts meets regularly
- ❑ Securities selection process is not committee driven – PMs are responsible for managing their portfolios

SCHWARTZ INVESTMENT COUNSEL, INC.

Alpha Generation

- ❑ Alpha added through our disciplined bottom-up security selection
- ❑ Focus on sound operating fundamentals, conservative capital structures and proven staying power should lead to our companies doing well over entire market cycles
- ❑ Expect portfolios to perform well on a relative basis when economy is struggling
- ❑ Expect portfolios to have weaker relative performance when economy is rapidly growing or when investors are more inclined to speculation

AVE MARIA GROWTH FUND

AVE MARIA GROWTH FUND

Investment Objective

The Ave Maria Growth Fund (AVEGX) investment objective is capital appreciation from companies of all sizes that offer above-average potential for growth in revenues, profits and cash flow.

Investment Strategy

- Seek to invest in exceptional companies with sustainable competitive advantages (moats). Wide moats create barriers to entry and provide pricing power. Companies with wide moats typically demonstrate high returns on equity/invested capital (ROE/ROIC)
- Seek to invest in companies with opportunities to reinvest cash flows at high incremental returns
- Avoid hyper-growth companies without established track records
- Avoid companies with high financial leverage. Companies with high debt cannot control their own destiny, especially if operating in cyclical industries
- Price matters. Buying even exceptional companies at excessive valuations leads to disappointing long-term investment performance

AVE MARIA GROWTH FUND

Investment Process

AVE MARIA GROWTH FUND

Investable Universe

- ❑ We exclude stocks inconsistent with core values and teachings of the Roman Catholic Church. This excludes about 5% of the companies in the Russell 3000® Index
- ❑ We may invest in foreign companies, either indirectly through depositary receipts or directly if the shares are U.S. dollar-denominated and traded on a U.S. securities exchange or domestically in the over-the-counter markets
- ❑ AVEGX uses a growth at a reasonable price (GARP) strategy, focusing on mid-cap and large-cap companies with sustainable competitive advantages and high returns on invested capital

AVE MARIA GROWTH FUND

Why Moats Matter

- The wider the company's moat, the longer it can reinvest its cash flows at returns above its cost of capital. These excess returns (shaded blue below) lead to high returns on equity and invested capital (ROE/ROIC) and compound the company's intrinsic value over time

AVE MARIA GROWTH FUND

Identifying the Moat Source

- A sustainable competitive advantage (a moat) may come from one or more of the following sources:
 - Intangible assets: Brands, patents, regulatory licenses
 - Moody's, S&P Global
 - Customer switching costs: Tight integration with a customer's business, monetary costs, and non-monetary costs
 - ANSYS, Inc., SBA Communications
 - Network effect: Value of the product or service increases with the number of users
 - Copart, Mastercard
 - Sustainable cost advantage: Cheaper processes, better locations, and unique resources
 - Broadridge Financial Solutions, HEICO

AVE MARIA GROWTH FUND

Not All High ROE is Equal

- ROE composition matters. High quality ROE comes from high margins and asset turnover rather than high financial leverage
- We use the DuPont Identity to evaluate the relative contribution of the three determinants of ROE

DuPont Identity

$$\begin{array}{ccccccc} \text{Net Margin} & \times & \text{Asset Turnover} & \times & \text{Financial Leverage} & = & \text{Return on Equity} \\ \downarrow & & \downarrow & & \downarrow & & \downarrow \\ \frac{\text{Net Income}}{\text{Sales}} & \times & \frac{\text{Sales}}{\text{Total Assets}} & \times & \frac{\text{Total Assets}}{\text{Total Equity}} & = & \frac{\text{Net Income}}{\text{Total Equity}} \end{array}$$

AVE MARIA GROWTH FUND

Buy Discipline

Price matters. Buying even exceptional companies at excessive valuations leads to disappointing investment performance.

- ❑ It's important to establish a “margin of safety” by investing in companies when prices are below our estimate of intrinsic value
- ❑ Maintaining our “farm team” is important. We have research coverage of companies with sustainable competitive advantages that we want to own at the right price, ready to invest when prices fall below our estimate of intrinsic value
- ❑ Our preferred fundamental valuation techniques include:
 - Discounted cash flows (primary focus)
 - Free cash flow yield
 - Earnings yield

AVE MARIA GROWTH FUND

Risk Controls

- ❑ Risk-reducing stock selection process using bottom-up stock selection based on fundamentals (well managed companies with low debt)
- ❑ Industry concentration limited to no more than 25%
- ❑ Position sizes generally limited to 3% at the time of purchase
- ❑ Portfolio holdings typically range from 30-45 issues

AVE MARIA GROWTH FUND

Sell Discipline

- ❑ Company becomes a violator of any moral screen established by our Catholic Advisory Board
- ❑ Stock price significantly exceeds our estimate of intrinsic value
- ❑ Company's economic moat is eroding, either due to internal or external factors (deteriorating fundamentals)
- ❑ Because we purchase companies with strong long-term prospects, we anticipate a low level of turnover

IMPORTANT INFORMATION FOR INVESTORS

Schwartz Investment Counsel, Inc., a registered investment adviser established in 1980, serves as investment adviser for Ave Maria Mutual Funds and invests only in securities that meet the Funds' investment and religious requirements. The returns may be lower or higher than if decisions were based solely on investment considerations. The method of security selection may or may not be successful and the Funds may underperform or outperform the stock market as a whole. All mutual funds are subject to market risk, including possible loss of principal. The Funds' investments in small and mid capitalization companies could experience greater volatility than investments in large capitalization companies. AVEWX invests in foreign securities and securities issued by U.S. entities with substantial foreign operations. Investments in these securities can involve additional risks relating to political, economic or regulatory conditions in foreign countries. These risks include less stringent investor protection and disclosure standards of some foreign markets; fluctuations in foreign currencies; and withholding or other taxes. AVEFX invests primarily in fixed income securities and as a result the Fund is also subject to the followings risks: interest rate risk, credit risk, credit rating risk and liquidity risk. AVEDX invests primarily in dividend paying companies and it is possible these companies may eliminate or reduce their dividend payments. AVEAX is classified as non-diversified and may therefore invest a greater percentage of its assets in the securities of a limited number of issuers than a fund that is diversified. At times, the Fund may overweight a position in a particular issuer or emphasize investment in a limited number of issuers, industries or sectors, which may cause its share price to be more susceptible to any economic, business, political or regulatory occurrence affecting an issuer than a fund that is more widely diversified. The issuers that the Fund may emphasize will vary from time to time.
