SCHWARTZ INVESTMENT COUNSEL, INC.

Equity Investment Discipline

- ❑ Emphasize companies with superior business characteristics
- ❑ Utilize independent analysis and proprietary screening supplemented by Wall Street research
- ❑ Purchase shares of financially sound companies when they are out of favor and attractively priced
- ❑ Buy across market capitalizations if price represents a significant discount to our estimate of intrinsic value
- ❑ Contrarian discipline designed to reduce the risk of loss and enhance returns
- ❑ Sell stocks when they no longer meet our standards

SCHWARTZ INVESTMENT COUNSEL, INC.

Research Process

- ❑ Focus on fundamentals – income statements, balance sheets and cash flow statements in conjunction with growth prospects
- ❑ Augment with external research from a variety of sources (for factual data)
- ❑ Make decisions based on assessment of risk/reward relationship
- ❑ Investment committee comprised of all portfolio managers and analysts meets regularly
- ❑ Securities selection process is not committee driven – PMs are responsible for managing their portfolios

SCHWARTZ INVESTMENT COUNSEL, INC.

Alpha Generation

- ❑ Alpha added through our disciplined bottom-up security selection
- ❑ Focus on sound operating fundamentals, conservative capital structures and proven staying power should lead to our companies doing well over entire market cycles
- ❑ Expect portfolios to perform well on a relative basis when economy is struggling
- ❑ Expect portfolios to have weaker relative performance when economy is rapidly growing or when investors are more inclined to speculation

Searching For An Investment That Shares Your Values?

Wise Investors are selective; they recognize the impact of investment choices on the lives of those around them. If you do not want to own stocks of companies that support abortion, pornography or other anti-family policies, consider the Ave Maria Mutual Funds.

AVE MARIA FOCUSED FUND

AVE MARIA FOCUSED FUND

Investment Objective

The Ave Maria Focused Fund (AVEAX) investment objective is capital appreciation from companies of all sizes and geographies that offer above-average potential for growth in free cash flow per share. As a non-diversified fund, the Fund may invest a substantial portion of its assets in a small numbers of issuers, industries, or sectors.

Investment Strategy

- ❑ Seek to invest in companies with durable, forecastable, and growing earnings. Companies with these attributes often have a strong competitive advantage and an economic moat that differentiates from its competitors
- ❑ Seek to invest in companies with the ability to earn high rates of return on incremental invested capital
- ❑ Seek to invest in companies with a long runway for redeployment of capital within their existing businesses
- ❑ Seek to invest in companies with management teams that are adept in both capital allocation and operational management
- ❑ The Fund aims to pay reasonable prices for its holdings and own them for a long time

AVE MARIA FOCUSED FUND

Investment Process

AVE MARIA FOCUSED FUND

Investable Universe

- ❑ We exclude stocks inconsistent with core values and teachings of the Roman Catholic Church. This excludes about 5% of the companies in the Russell 3000® Index
- ❑ We may invest in foreign companies, either indirectly through depositary receipts or directly
- ❑ AVEAX uses a growth at a reasonable price (GARP) strategy, focusing on companies with sustainable competitive advantages and high returns on incremental invested capital
- ❑ AVEAX may buy companies of any size

AVE MARIA FOCUSED FUND

Why Moats Matter

- The wider the company's moat, the longer it can reinvest its cash flows at returns above its cost of capital. These excess returns (shaded blue below) lead to high returns on equity and invested capital (ROE/ROIC) and compound the company's intrinsic value over time
- Return on Incremental Invested Capital is an indication of the strength of the moat

AVE MARIA FOCUSED FUND

Identifying the Moat Source

- A sustainable competitive advantage (a moat) may come from one or more of the following sources:
 - Intangible assets: Brands, patents, regulatory licenses
 - Chemed, Green Plains, Archaea Energy, Valvoline
 - Customer switching costs: Tight integration with a customer's business, monetary costs, and non-monetary costs
 - Autodesk, Microsoft, Tyler, eDreams, Radius
 - Network effect: Value of the product or service increases with the number of users
 - DigitalBridge, NextDC, AMMO, Inc.
 - Sustainable cost advantage: Cheaper processes, better locations, and unique resources
 - APi Group, eDreams, GFL, TPL, Valvoline

AVE MARIA FOCUSED FUND

Not All High ROE is Equal

- ROE composition matters. High quality ROE comes from high margins and asset turnover rather than high financial leverage
- We use the DuPont Identity to evaluate the relative contribution of the three determinants of ROE

DuPont Identity

$$\begin{array}{ccccccc} \text{Net Margin} & \times & \text{Asset Turnover} & \times & \text{Financial Leverage} & = & \text{Return on Equity} \\ \downarrow & & \downarrow & & \downarrow & & \downarrow \\ \frac{\text{Net Income}}{\text{Sales}} & \times & \frac{\text{Sales}}{\text{Total Assets}} & \times & \frac{\text{Total Assets}}{\text{Total Equity}} & = & \frac{\text{Net Income}}{\text{Total Equity}} \end{array}$$

Portfolio Characteristics as of September 30, 2022*

■ Ave Maria Focused Fund

■ S&P 500® Index

■ S&P MidCap 400® Growth Index

- AVEAX is invested in companies with stronger fundamentals than the S&P 500® Index and the S&P MidCap 400® Growth Index.

ROE is calculated based on the composite fundamental data.

AVE MARIA FOCUSED FUND

Buy Discipline

The managers purchase an investment after completing due diligence only if the managers believe in the investment's ability to generate at least a 15% total return CAGR over a 5-year time horizon

- Our preferred fundamental valuation techniques include:
 - Discounted cash flows (primary focus)
 - Free cash flow yield
 - Earnings yield
- Fundamental research – due diligence – includes, but is not limited to, reading several years of financial reports and earnings call transcripts, discussions with management, competitors, suppliers, customers, and former employees

■ S&P 500® Index

Price/Free Cash Flow (NTM)

PEG Ratio

- Source: Capital IQ
- Note: PEG Ratio is calculated by dividing the Price/FCF (NTM) by the 3-year Free Cash Flow CAGR. Additionally, PGRE and LFG were excluded due to lack of forward FCF estimates. P/FCF and PEG Ratio calculated as of 10/20/22. Due to limited availability of consensus estimates for the S&P MidCap 400 Growth index, we are only showing the S&P 500 Index above.

AVE MARIA FOCUSED FUND

Risk Controls

- ❑ Risk-reducing stock selection process using bottom-up stock selection based on fundamentals (high quality companies)
- ❑ Portfolio is monitored on an ongoing basis
- ❑ Industry concentration limited to no more than 25%, based on purchase price
- ❑ The Fund has a regulatory limit of 50% (based on purchase price) of cumulative positions representing 5% or greater of the Fund's assets
- ❑ Portfolio holdings typically range from 15-20 issues

AVE MARIA FOCUSED FUND

Portfolio Company Monitoring

We don't get overly concerned with short-term factors such as earnings beats or misses. Instead, we monitor for:

- ❑ Adherence to our moral screens
- ❑ Strengthening or deterioration of economic moats
- ❑ Organic growth
- ❑ Capital allocation decisions

AVE MARIA FOCUSED FUND

Sell Discipline

- ❑ Company becomes a violator of any moral screen established by our Catholic Advisory Board
- ❑ Company's economic moat is eroding, either due to internal or external factors (deteriorating fundamentals)
- ❑ Company is deviating from our investment thesis
- ❑ Because we purchase companies with strong long-term prospects, we anticipate a low level of turnover (27% in 2021)

IMPORTANT INFORMATION FOR INVESTORS

Schwartz Investment Counsel, Inc., a registered investment adviser established in 1980, serves as investment adviser for Ave Maria Mutual Funds and invests only in securities that meet the Funds' investment and religious requirements. The returns may be lower or higher than if decisions were based solely on investment considerations. The method of security selection may or may not be successful and the Funds may underperform or outperform the stock market as a whole. All mutual funds are subject to market risk, including possible loss of principal. The Funds' investments in small and mid capitalization companies could experience greater volatility than investments in large capitalization companies. AVEWX invests in foreign securities and securities issued by U.S. entities with substantial foreign operations. Investments in these securities can involve additional risks relating to political, economic or regulatory conditions in foreign countries. These risks include less stringent investor protection and disclosure standards of some foreign markets; fluctuations in foreign currencies; and withholding or other taxes. AVEFX invests primarily in fixed income securities and as a result the Fund is also subject to the followings risks: interest rate risk, credit risk, credit rating risk and liquidity risk. AVEDX invests primarily in dividend paying companies and it is possible these companies may eliminate or reduce their dividend payments. AVEAX is classified as non-diversified and may therefore invest a greater percentage of its assets in the securities of a limited number of issuers than a fund that is diversified. At times, the Fund may overweight a position in a particular issuer or emphasize investment in a limited number of issuers, industries or sectors, which may cause its share price to be more susceptible to any economic, business, political or regulatory occurrence affecting an issuer than a fund that is more widely diversified. The issuers that the Fund may emphasize will vary from time to time.
