# MORALLY RESPONSIBLE INVESTING

*“...the decision to invest in one place rather than another, in one productive sector rather than another, is always a moral and cultural choice. The decision to invest is also determined by an attitude of human sympathy and trust in Providence, which reveals the human quality of the person making such decisions.”*

Saint Pope John Paul II

Centesimus Annus, #36

## Religious Focus Equity Funds Comparison

Total Returns (%) for the periods ended March 31, 2022 (^Annualized)

- Religious Focus Equity Funds
- Average Equity Fund

Past performance does not guarantee future results. You cannot invest directly in an index. It is not possible to invest in the category of funds we refer to as Religious Focus Equity Funds (the "RFEF"). The RFEF was created by Schwartz Investment Counsel, Inc. ("SICI") to provide an example of how the performance of faith based mutual funds compare over time to the non-faith based funds. The underlying performance data for each of the funds making up the RFEF was derived from Morningstar Direct. As of March 31, 2022, the Average Equity Fund Group was comprised of 3,435, 3,223, 2,993 and 2,427 equity funds for the 1- year, 3-year, 5-year and 10-year periods, respectively. To be classified as an equity fund Morningstar requires that a majority of a fund's holdings be invested in stocks. Please note that the performance numbers of the Average Equity Fund Group excludes RFEF funds and was calculated using a simple average for all the equity funds tracked by Morningstar for the respective periods. Morningstar did not calculate the performance numbers used for the RFEF. SICI calculated the average performance (simple average not asset weighted) for the RFEF over the stated periods. The performance numbers of the RFEF should not be considered representative of the performance of the Ave Maria Mutual Funds. Included at the end of this report is a performance table showing the standardized performance data of the Ave Maria Mutual Funds through the most recent calendar quarter end. To calculate a simple average each fund is assigned an equal weighting, while a weighted average would assign different weightings to each based on certain criteria, such as size. Performance data quoted represents past performance, which is no guarantee of future results. Investment return and principal value are historical and may fluctuate so that redemption value may be worth more or less than the original cost. Current performance may be lower or higher than what is quoted. Call 1-866-AVE-MARIA or visit [www.avemariafunds.com](http://www.avemariafunds.com) for the most current month-end performance.

**Important Definitions**

The S&P 500® Index is a capitalization weighted unmanaged index of 500 widely traded stocks, created by Standard & Poor's. The index is considered to represent the performance of the stock market in general.

The S&P 500® Value Index is a market-capitalization-weighted index developed by Standard & Poor's consisting of those stocks within the S&P 500® Index that exhibit strong value characteristics.

The S&P 400® Midcap Index is an unmanaged index created by Standard & Poor's made up of 400 midcap companies. The index is the most widely used index for mid-sized companies.

The S&P MidCap 400® Growth Index is an unmanaged benchmark representing medium-size U.S. growth companies.

The S&P Global 1200® Index is a global index, capturing approximately 70% of the world's capital markets. It is a composite of 31 local markets from seven headline indices, many of which are accepted leaders in their regions.

The MSCI All Country World Index is a broad global equity index that is designed to track broad global equity-market performance. Maintained by Morgan Stanley Capital International (MSCI), the index is comprised of the stocks of about 3,000 companies from 23 developed countries and 26 emerging markets. The Ave Maria World Equity Fund changed its primary benchmark from the S&P Global 1200® Index to the MSCI ACWI Index because the latter is more representative of the Fund's portfolio composition.

The Bloomberg Intermediate U.S. Govt./Credit Index represents securities in the intermediate range of the Bloomberg Government/Credit Index. The Government/Credit Index includes Treasuries, Government-Related Issues, and USD Corporates and is a subset of the U.S. Aggregate Index.

Indexes do not incur fees and it is not possible to invest directly in an index.

**IMPORTANT INFORMATION FOR INVESTORS**

**Schwartz Investment Counsel, Inc., a registered investment adviser established in 1980, serves as investment adviser for Ave Maria Mutual Funds and invests only in securities that meet the Funds' investment and religious requirements. The returns may be lower or higher than if decisions were based solely on investment considerations.** The method of security selection may or may not be successful and the Funds may underperform or outperform the stock market as a whole. All mutual funds are subject to market risk, including possible loss of principal. The Funds' investments in small and mid capitalization companies could experience greater volatility than investments in large capitalization companies. AVEWX invests in foreign securities and securities issued by U.S. entities with substantial foreign operations. Investments in these securities can involve additional risks relating to political, economic or regulatory conditions in foreign countries. These risks include less stringent investor protection and disclosure standards of some foreign markets; fluctuations in foreign currencies; and withholding or other taxes. AVEFX invests primarily in fixed income securities and as a result the Fund is also subject to the followings risks: interest rate risk, credit risk, credit rating risk and liquidity risk. AVEDX invests primarily in dividend paying companies and it is possible these companies may eliminate or reduce their dividend payments. AVEAX is classified as non-diversified and may therefore invest a greater percentage of its assets in the securities of a limited number of issuers than a fund that is diversified. At times, the Fund may overweight a position in a particular issuer or emphasize investment in a limited number of issuers, industries or sectors, which may cause its share price to be more susceptible to any economic, business, political or regulatory occurrence affecting an issuer than a fund that is more widely diversified. The issuers that the Fund may emphasize will vary from time to time.
