The Importance of a Global Perspective on Stocks

- Two-thirds of the world's investment opportunities lie outside of the United States
- The U.S. represents only 16% of the world's total gross domestic product (GDP)¹
- In 2021, 74 countries ranked ahead of the U.S. for GDP real growth rate¹
- Global stocks outperformed U.S. stocks in 8 of the 20 calendar years from 2003 to 2022²

AVE MARIA WORLD EQUITY FUND

Investment Objective

The principal goal of the Ave Maria World Equity Fund is long-term capital appreciation. The Fund invests at least 80% of its net assets in common stocks of companies whose focus is global in nature. The Fund will invest at least 60% of its net assets in common stocks issued by non-U.S. companies.¹

Investment Philosophy

We seek to invest in competitively advantaged companies when they are mispriced by the market. We believe that fundamental research can identify these companies and may lead to long-term alpha generation.

¹ A company is deemed to be a “non-U.S. company” if it is headquartered outside the U.S. or has at least 50% of its revenues or operations outside of the U.S. at the time of original purchase.

IMPORTANT INFORMATION FOR INVESTORS

Schwartz Investment Counsel, Inc., a registered investment adviser established in 1980, serves as investment adviser for Ave Maria Mutual Funds and invests only in securities that meet the Funds' investment and religious requirements. The returns may be lower or higher than if decisions were based solely on investment considerations. The method of security selection may or may not be successful and the Funds may underperform or outperform the stock market as a whole. All mutual funds are subject to market risk, including possible loss of principal. The Funds' investments in small and mid capitalization companies could experience greater volatility than investments in large capitalization companies. AVEWX invests in foreign securities and securities issued by U.S. entities with substantial foreign operations. Investments in these securities can involve additional risks relating to political, economic or regulatory conditions in foreign countries. These risks include less stringent investor protection and disclosure standards of some foreign markets; fluctuations in foreign currencies; and withholding or other taxes. AVEFX invests primarily in fixed income securities and as a result the Fund is also subject to the followings risks: interest rate risk, credit risk, credit rating risk and liquidity risk. AVEDX invests primarily in dividend paying companies and it is possible these companies may eliminate or reduce their dividend payments. AVEAX is classified as non-diversified and may therefore invest a greater percentage of its assets in the securities of a limited number of issuers than a fund that is diversified. At times, the Fund may overweight a position in a particular issuer or emphasize investment in a limited number of issuers, industries or sectors, which may cause its share price to be more susceptible to any economic, business, political or regulatory occurrence affecting an issuer than a fund that is more widely diversified. The issuers that the Fund may emphasize will vary from time to time.
