# SCHWARTZ INVESTMENT COUNSEL, INC.

## Equity Investment Discipline

- ❑ Emphasize companies with superior business characteristics
- ❑ Utilize independent analysis and proprietary screening supplemented by Wall Street research
- ❑ Purchase shares of financially sound companies when they are out of favor and attractively priced
- ❑ Buy across market capitalizations if price represents a significant discount to our estimate of intrinsic value
- ❑ Contrarian discipline designed to reduce the risk of loss and enhance returns
- ❑ Sell stocks when they no longer meet our standards

# SCHWARTZ INVESTMENT COUNSEL, INC.

## Research Process

- ❑ Focus on fundamentals – income statements, balance sheets and cash flow statements in conjunction with growth prospects
- ❑ Augment with external research from a variety of sources (for factual data)
- ❑ Make decisions based on assessment of risk/reward relationship
- ❑ Investment committee comprised of all portfolio managers and analysts meets regularly
- ❑ Securities selection process is not committee driven – PMs are responsible for managing their portfolios

# SCHWARTZ INVESTMENT COUNSEL, INC.

## Alpha Generation

- ❑ Alpha added through our disciplined bottom-up security selection
- ❑ Focus on sound operating fundamentals, conservative capital structures and proven staying power should lead to our companies doing well over entire market cycles
- ❑ Expect portfolios to perform well on a relative basis when economy is struggling
- ❑ Expect portfolios to have weaker relative performance when economy is rapidly growing or when investors are more inclined to speculation

# AVE MARIA VALUE FUND

# AVE MARIA VALUE FUND

## Investment Objective

The Ave Maria Value Fund's investment objective is capital appreciation from primarily small and mid-sized companies that are believed to be undervalued relative to their intrinsic worth.

## Investment Strategy

- We are bottom-up, fundamental value investors
- We utilize fundamental security analysis to identify securities selling at a discount to intrinsic value
- We seek to invest in high quality companies, in sound financial condition, selling at attractive valuations. We sell them when they no longer meet our standards.
- Investing in companies that possess strong operating fundamentals may provide a margin of safety and reduce downside risk
- Managing the Fund with a value focus requires us to be long-term oriented, disciplined and patient

# AVE MARIA VALUE FUND

## Investment Process

# AVE MARIA VALUE FUND

## Investable Universe

- The Fund invests primarily in small- and mid-cap companies, with the majority of investments in companies with market caps between \$5-25 billion
- We exclude stocks inconsistent with core values and teachings of the Roman Catholic Church. This excludes about 5% of the companies in the Russell 3000 Index<sup>®</sup>
- We may invest in foreign companies, either indirectly through depositary receipts or directly

# AVE MARIA VALUE FUND

## Buy Discipline

- Price matters. Buying even exceptional companies at an excessive valuation will reduce the chance for superior investment performance.
- We always seek a margin of safety by investing in companies when prices are below our estimate of intrinsic value.

# AVE MARIA VALUE FUND

## Buy Discipline

Portfolio companies will typically have one or more of the following characteristics:

- ❑ Above average free cash flow generation
- ❑ High returns on equity and capital, with low debt levels
- ❑ Sustainable competitive advantage owing to proprietary products or services, dominant market position or specialty niche
- ❑ Shareholder-friendly management that has a demonstrated track record of wise capital allocation
- ❑ Attractive valuation based upon fundamentals, including: earnings, cash flow, book value and enterprise value
- ❑ Out-of-favor, underfollowed or misunderstood companies

# AVE MARIA VALUE FUND

## Risk Controls

- ❑ Risk-reducing stock selection process using a fundamentals-based approach
- ❑ Portfolio is constructed one stock at a time, from the bottom-up
- ❑ Portfolio is diversified across a variety of industry sectors with industry concentration limited to no more than 25%
- ❑ Position sizes generally limited to 3% at the time of purchase, with a maximum position of 5% on cost basis
- ❑ Portfolio typically has 35-45 holdings

# AVE MARIA VALUE FUND

## Sell Discipline

- ❑ Company becomes a violator of any moral screen established by our Catholic Advisory Board
- ❑ Stock price significantly exceeds our estimate of intrinsic value
- ❑ We identify another security that provides a more attractive risk-reward alternative
- ❑ Company's financial performance deteriorates due to internal or external factors

## IMPORTANT INFORMATION FOR INVESTORS

Schwartz Investment Counsel, Inc., a registered investment adviser established in 1980, serves as investment adviser for Ave Maria Mutual Funds and invests only in securities that meet the Funds' investment and religious requirements. The returns may be lower or higher than if decisions were based solely on investment considerations. The method of security selection may or may not be successful and the Funds may underperform or outperform the stock market as a whole. All mutual funds are subject to market risk, including possible loss of principal. The Funds' investments in small and mid capitalization companies could experience greater volatility than investments in large capitalization companies. AVEWX invests in foreign securities and securities issued by U.S. entities with substantial foreign operations. Investments in these securities can involve additional risks relating to political, economic or regulatory conditions in foreign countries. These risks include less stringent investor protection and disclosure standards of some foreign markets; fluctuations in foreign currencies; and withholding or other taxes. AVEFX invests primarily in fixed income securities and as a result the Fund is also subject to the followings risks: interest rate risk, credit risk, credit rating risk and liquidity risk. AVEDX invests primarily in dividend paying companies and it is possible these companies may eliminate or reduce their dividend payments. AVEAX is classified as non-diversified and may therefore invest a greater percentage of its assets in the securities of a limited number of issuers than a fund that is diversified. At times, the Fund may overweight a position in a particular issuer or emphasize investment in a limited number of issuers, industries or sectors, which may cause its share price to be more susceptible to any economic, business, political or regulatory occurrence affecting an issuer than a fund that is more widely diversified. The issuers that the Fund may emphasize will vary from time to time.
